

# **OEM Pressure Sensors "MobilTrans"**

For mobile hydraulics

**Accuracy 1%** 

Standard output: 4...20mA; 2-wire

or 0...5VDC; 3-wire or 0...10VDC; 3-wire

or 0.5...4.5VDC; ratiometric

# **Description**

Our new pressure sensor MobilTrans is designed for rough environments and extreme applications e.g. mobile hydraulics systems where shock and vibration but also pressure peaks or steam jet cleaning are daily routine. All of these effects have no impact on the accuracy and reliability of our measurements. Due to fully automated production we can offer very attractive prices and high quantities.

A high degree of automation is used to produce the MobilTrans pressure transducer, which enhances consistency and reliability.

### **Features**

- o Measuring ranges from 0...60bar to 0...600bar
- o Highly resistant to shock and vibrations
- High EMC-protection (100V/m) according to EN 61 326
- o Compact design
- o Protection up to IP69K
- Excellent temperature performance (-40°C to 125°C)
- o Resistance to pressure peaks (CDS system)

### **Applications**
